

Jeff Ubayi

Full-cycle Developer

I love learning and solving problems and I'm eager to work and utilize my skills as part of a team I can grow with. I believe that given a chance, with my skills, passion and motivation to excel I can be an asset to your company.

EXPERIENCE

EACDirectory — Junior Developer (Nov 2019 - present)

Developed and hosted a full-stack website with heroku and digital ocean.

Learned Git and Github platform and got accustomed to frontend development using the company's website builder platform.

Utilized my mornings, nights and weekends to learn about and gain experience in software development.

PROJECTS

Portfolio — [Demo Code](#)

- My personal blog where I document everything I learn.
- Built with React, gatsby and GraphQL

Nai-blog — [Demo Code](#)

- A modern javascript blog site with a similar Netflix theme.
- Built with jekyll and Ruby Gems, the blog site is accustomed with a netlify-cms, SEO and recommendation for articles.

Macrina — [Demo Code](#)

- A cloth-store built utilizing React and CSS on the front end and showcases a fully functioning shopping cart.
- Backend API built with django to retrieve product and categories

Events Api — [code](#)

- An event scheduler application, sort of like a mini version of Meetup.com.
- Python web API endpoint built with django and DRF for events attendance.

Budget App — [Demo code](#)

- Add and adjust your budget and keep track of items you need/want.
- The app will add/subtract from your budget as you add/remove items.
